

# UKC 2023 Keynote Symposium

## Workforce of the Future: Education and Careers

Future Careers in Technology and Entrepreneurship

10:30am, August 4, 2023, Friday, Room Maverick

The job market, particularly in technology, is constantly evolving with changes such as hybrid remote work, job automation by artificial intelligence, and increasing interests in entrepreneurship and startups. To succeed in the future job market, individuals must stay up to date and adapt to new technologies and the market environment. This keynote symposium targets mid-career and young professionals, as well as the young generation. It will feature speakers discussing future careers in technology and entrepreneurship, how to acquire new job skills, advance in corporate careers, or start a company. The symposium will culminate in a speaker panel session with an open discussion and Q&A.
