Multipurpose Synchrotron Radiation (4GSR)

Current States and Future Prospects at the Korea Basic Science Institute (KBSI)

1:30pm, August 4, 2023, Friday, Vandergriff

To promote the collaborative development and utilization of the synchrotron facility, we would like to introduce the recent progress of the new multipurpose synchrotron (4GSR) project and x-ray science programs in Korea. We also invite speakers of accelerator and x-ray science in US society to find a way for future collaboration.
