

UKC 2023 Distinguished Forum

KWiSE-WISET Women in STEM Forum

In collaboration with KOFWST-KWSE

1:00pm, August 3, 2023, Thursday, Developers

KWiSE Forum

After an opening session by KWiSE and WISET, KWiSE-KWSE Session will discuss the current and planned global collaborations in women in STEM and future directions. Speakers will share examples of various on-going successful global collaborations, including Korea-US and Korea-UK. Based on these examples, we will discuss how women scientists and engineers can further strengthen existing collaboration and foster new collaborations.

The KWiSE-KOFWST Session will discuss future directions and vision of organizations working for women in STEM. Vision and path forward of the two organizations (KOFWST and KWiSE) will be shared, then a panel discussion will follow on how to empower women scientists and engineers. This forum is designed to be an interactive and engaging event to foster networking and mentoring among the attendees. The forum will provide an excellent opportunity for the participants to learn from the women leaders in the STEM fields and get inspired to become a future leader in STEM.
