

UKC 2023 KSEA Forum

R&D Leadership Forum

Roundtable Discussion on R&D Culture and Collaboration

4:00pm, August 3, 2023, Thursday, Room Developers

R&D Leadership Forum

Research institutes operated for/by government and private sectors have well-defined and focused missions for technological development and/or scientific knowledge that rely on strong foundational expertise, culture, and capability. Increasingly complex and interdisciplinary requirements for substantial and meaningful outcomes warrant an expansive network of R&D expertise, inclusive activities, and efficient administration. This roundtable discussion will examine the mission, capability, and accomplishment of various research institutes, explore the potential roles of complimentary resources to enhance the mission-critical and mission-supporting R&D activities, and discuss cultural understanding and potential mechanisms needed to further promote US-Korea interactions in R&D.
