

# UKC 2023 Keynote Symposium

## Workforce of the Future: Education and Careers

Convergence in Education and Workforce Development

10:30pm, August 3, 2023, Thursday, Room Maverick

Powerful technologies, such as artificial intelligence, automation, robotics, and the internet of things, are disrupting the nature of work and reshaping the landscape of jobs. New forms of learning, skills assessments, and job training are exposing pitfalls of traditional degree-centric requirements in tech hiring. The approach to developing and sustaining talent supply chain must change. This UKC 2023 Keynote Symposium explores convergent perspectives on education and workforce development. Experts and stakeholders are invited to offer insights on how the benefits of emerging technology can be leveraged to equitably impact current and future workforce.

**Gloria J. Kim**  
Chair

Assistant Professor  
Department of  
Engineering Education  
University of Florida

**Curtis J. Bonk**  
Topical Plenary

Professor  
School of Education  
Indiana University
